Iconcept Press, United States, 2014. Paperback. Book Condition: New. 254 x 203 mm. Language: English . Brand New Book ***** Print on Demand *****.Diabetes is a group of metabolic diseases in which a person has high blood sugar, either because the body does not produce enough insulin, or because cells do not respond to the insulin that is produced. This high blood sugar produces the classical symptoms of polyuria (frequent urination), polydipsia (increased thirst) and polyphagia (increased hunger). Research on Diabetes II provides the latest research and development in the area of diabetes by presenting a succinct review of the works that researchers struggling to find answers for 200 million diabetics world-wide, where the number of those afflicted is expected to double, if not triple, in coming decades. Chapter 1 describes the strong relationship between diabetes (DM) and infection. Infections can elicit diabetes or make glycaemic control difficult. Chapter 2 presents the idea of using traditional indian medicinal plants used in the traditional Ayurvedic system to treat diabetes. Chapter 3 discusses the nutritional content of organic prickly pads. Findings show that different fiber quantity and mineral content along life cycle of prickly pads, suggesting that prickly pads are excellent option for people with diabetes due to the beneficial nutritional properties. Chapter 4 highlights the serious complications of diabetes mellitus, particularly oral complications. Chapter 5 discusses retropharyngeal abscess (RPA), a potentially serious deep space neck infection. Chapter 6 addresses the issue of erectile dysfunction. It is a common health related and quality of life issue in the diabetic patients population. Chapter 7 presents that fact that the presence of infection in a patient on dialysis has a substantial effect on cardiovascular mortality and morbidity, and should influence decisions regarding the use of therapies intended to minimize that risk. Chapter 8 discusses...
