

Nanomaterials

By R. K. Duchaniya

LAP Lambert Academic Publishing Aug 2012, 2012. Taschenbuch. Book Condition: Neu. 220x150x6 mm. This item is printed on demand - Print on Demand Neuware - Use of nanomaterials has broadly expanded for various applications in recent years. This study summerises the various methods of synthesis and characterization of nanomaterials used in engineering. ZnO-CdO nanocomposite was prepared by sol-gel method by using their respective nitrates. It is a simple and low cost method to prepare nanocomposites. The drying temperature and drying period of prepared gel was varied during the synthesis process. The prepared samples were characterized by using scanning electron microscope (SEM), particle size analysis (PSA), X-ray diffraction (XRD) and photoluminescence spectroscopy (PL). The particle size analysis was done to get idea of getting particle of nanosized range so that further characterization would be done for studies. The surface morphology of the composite was studied by the SEM, it showed that it has polyhedral and some elongated grains along with some clusters. 92 pp. Englisch.

Reviews

Extensive guide for ebook lovers. It generally does not cost excessive. Your way of life span will likely be convert the instant you complete looking at this ebook.

-- Rocky Dach

Certainly, this is the very best work by any author. It is amongst the most remarkable publication i have got study. I am just happy to inform you that this is actually the greatest pdf i have got study inside my individual daily life and can be he very best publication for at any time.
