

McGill University: Papers from the Department of Applied Science (Classic Reprint) (Paperback)

By H T Bovey

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from McGill University: Papers From the Department of Applied Science Gentlemen, - In undertaking to give an address as president of Section III. I am conscious of attempting a task of great difficulty, for few men, in these days of specialists, can claim adequately and fairly to represent the claims of pure mathematics, chemistry, astronomy and physics in general. The only plan seems to be for each to speak for his own department, trusting that in this manner the work of the section will be covered in the course of three or four years. I have, therefore, thought it best to call your attention chiefly to the latest phase of engineering, namely, that of an experimental science, and especially to the close connection between actual practice and experiment, and the progress of invention, as illustrated by the modern history of engineering. You will, I doubt not, pardon me if I refer somewhat freely to the work now being carried on in the laboratories of McGill University, as, though fully conscious that this is but one of...

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Ally Reichel**

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
