Excerpt: .parrots, big parties of the brilliant Lorius hyfasnochrus, and of several kinds of Trichoglossus, being seen to settle down among the foliage, wrestling amid loud shrieks for the access to the sweet nectar of the calyx, doing the wildest gymnastic tricks along the branches, and presenting a scene more frequently viewed in a well-furnished aviary than in wild nature. From the crown of the highest tree the voices of the white and black cockatoos are continually heard; then, again, you see a specimen of the stately Elcctus pectoralis, resplendent in the green, blue, and scarlet hues of his feathery dress. Now a kingfisher is seen darting like an arrow over the surface of the water. Besides the genuine short-tailed halcyons and kingfishers, which feed on fish and water-fowl, these regions harbour a genus surpassing in beauty of plumage and elegance of form all the others,...
