A NEURON-SPECIFIC PROTEIN FOUND IN SKELETAL MUSCLE: NEW FRONTIERS FOR GAP-43 (PAPERBACK)

DISSERTATION.COM, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.Growth Associated Protein 43 (GAP-43), isolated from rat brain and considered a neuronal marker, is involved in neurite branching, cytoskeleton remodelling, neuronal development and protection. However, GAP-43 mRNA was found in embryonic chicken cells positive to meromyosin, as well as in human satellite cells, myoblasts and myotubes deriving from healthy or dystrophic muscles. Despite these findings, there is...

Reviews

It becomes an incredible book which i have ever read through. This really is for anyone who statte that there was not a well worth reading through. You wont sense monotony at at any time of the time (that's what catalogs are for regarding when you question me).

-- Alf Grant

This sort of publication is everything and taught me to hunting ahead and much more. Better then never, though i am quite late in start reading this one. I am just very happy to explain how here is the best pdf i actually have read within my personal daily life and can be he greatest publication for actually. -- Laverne Farrell

This ebook can be worthy of a read, and much better than other. I have read and i am certain that i am going to planning to go through again once again in the future. You may like just how the writer compose this book.
